The Hayabusa Fishing Advantage

High Carbon Steel

- Material used in all Hayabusa hooks
- All Hayabusa hooks Made in Japan

Chemically Sharpened

- The process used to obtain incredibly sharp and dependable hook points.
- Ensures the highest quality fishing hooks in the industry.

Effortless Hooking Power

- The result of Hayabusa's NRB coating.

NRB - Fluorine Coating

- Engineered on many Hayabusa hook models. A slick coating that provides the most advanced hooking power and reliable hook-up ratio in the industry.

Original Point

- A unique elongated point special to Hayabusa models that are not finished with the NRB - Fluorine Coating.
